SUMMARY

Backend Engineer specializing in multi-framework backend development using Django, Spring Boot, Laravel and Node.js. I build clean, scalable APIs, implement secure authentication, and design optimized databases. Focused on writing maintainable code, shipping features fast, and improving system reliability.

WORK EXPERIENCE

Designation : Jr. Software Developer, Cybertron Technologies Pvt. Ltd Feb 2025 - Present

- Worked on backend features using Django and Laravel, including creating APIs, updating existing modules, and improving overall code structure.
- Contributed to building and maintaining admin dashboards by adding new functionalities, handling user/role management, Advertisement and AI integration and refining workflow logic.

PROJECTS

SGF-Portal – Project Management System

[SGF Portal](#)

Designed a full-stack portal to manage projects, tasks, and team workflows using a clean dashboard interface. Built features like role-based access, progress tracking, and automated status updates to make project handling easier.

EzzApply – Swipe-based Job Platform

[GitHub](#)

A Tinder-style job discovery web app where users can swipe to shortlist or skip jobs. Developed the core swipe UI, job card logic, and state management using React, along with initial backend planning and prototyping in Java.

AI Image Generator

A simple React application that uses the OpenAI API to generate images from user prompts. Includes a clean UI, loading states, and error handling for a smooth user experience.

EDUCATION

2021 - 2025	B.Tech CSE at Guru Nanak Dev University	(GPA: 8.0/10.0)
2021	Class 12th CBSE Board	(86.4%)
2019	Class 10th CBSE Board	(90.2%)

SKILLS

Backend Frameworks	Django, Laravel, Spring Boot, Node.js
Programming Languages	Python, PHP, Java, JavaScript
Databases	MySQL, PostgreSQL, SQLite
Tools	Git, GitHub, Postman, Linux, VS Code
Core Skills	REST API Development, Authentication (JWT/Session), RBAC, MVC Architecture, API Integration
Soft Skills	Problem-Solving, Team Collaboration, Communication
